

# Lexmark Scan User Guide

## Authentication

Before using the device, you must authenticate using one of the available login methods:

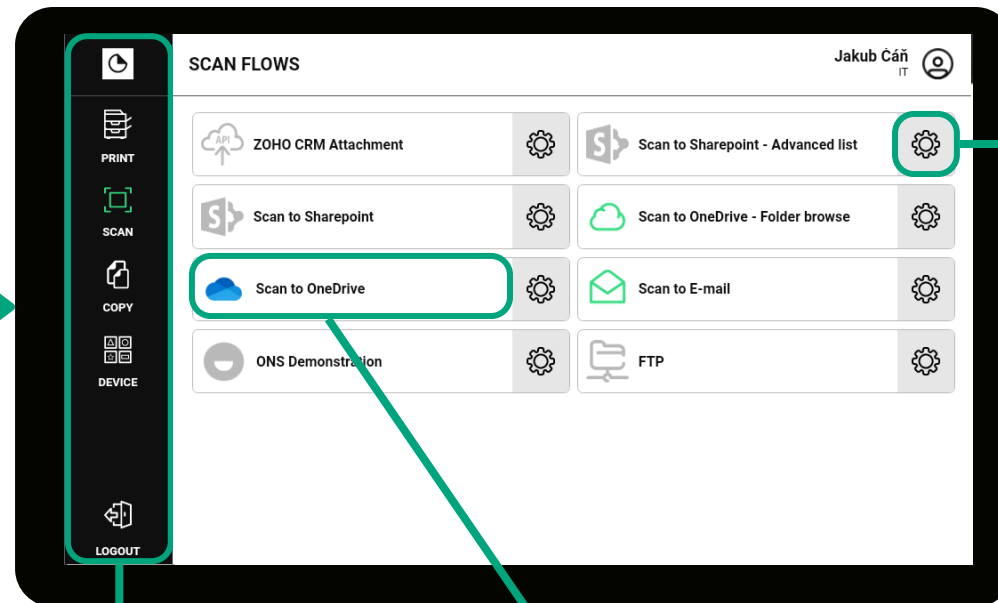

- **PIN** - Enter your OptimiDoc Cloud PIN directly on the device.
- **ID Card** - Authenticate by swiping your ID card on the device card reader.
- **Mobile Application** - Unlock the device using your mobile application

Once you have authenticated, you will be taken to the device's main menu or directly to the print & scan application (depending on your company's configuration). To open OptimiDoc, tap the OptimiDoc icon.

## Document workflows

The Scan section lists all scan workflows available for your account. You can either **perform a quick scan** by clicking the workflow icon or name, or access **advanced settings** by clicking the setup icon.

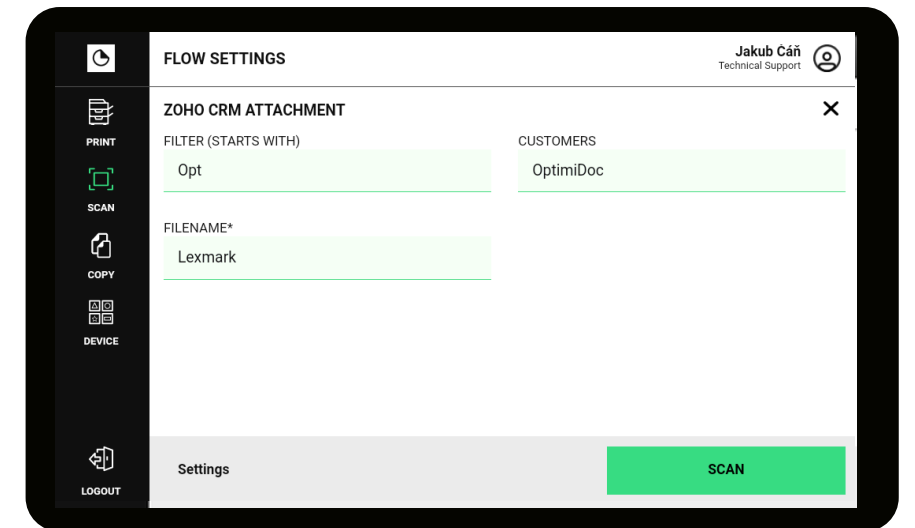

Quick scan

## Main menu

The **Main Menu** allows you to navigate between the device's native functions and OptimiDoc Cloud features.

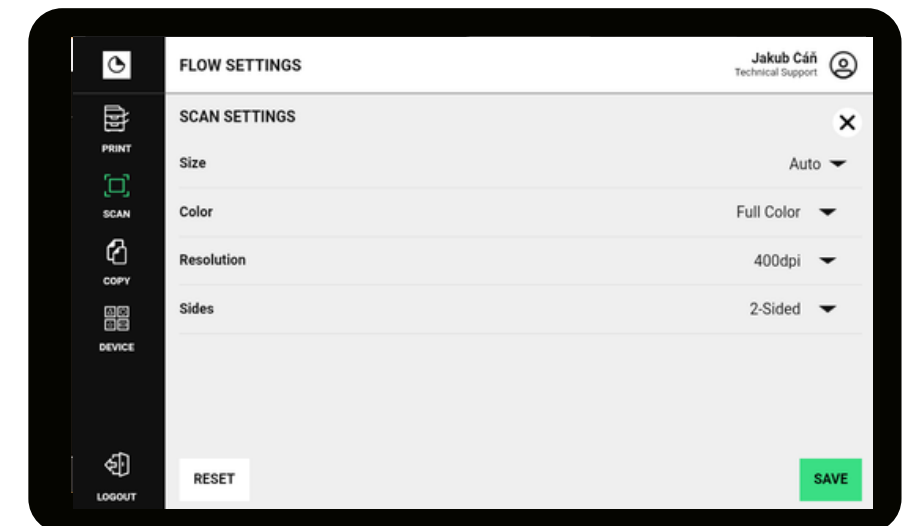

- **Print** - Opens the OptimiDoc Cloud printing section.
- **Scan** - Displays the list of available document workflows.
- **Copy** - Opens the device's native copy function.
- **Device** - Opens the main menu of the multifunction device.
- **Logout** - Signs out of the device.

## Document workflow detail

In the Document Workflow Details, you can enter manual parameters for the document, if required. Mandatory fields are marked with an asterisk (\*), and the scan cannot be started until all required parameters are completed. To start scanning, select **Scan**. If you need to adjust the scan parameters, select **Scan settings** to modify the scan configuration before starting the scan. Once the scan is completed, you are redirected back to the list of workflows.

## Scan settings

You can modify the final scan parameters by adjusting the document resolution, colour mode, or selecting single- or double-sided scanning. Once you have completed the configuration, select **Save**. To revert to the default workflow settings, select **Reset**.
